## TO DISRUPT THE GRANGE

Master Wilson Scents Plot  
Against the Or-  
der

DECLARES ATTEMPT  
IS BEING MADE

To Break Up the Organiza-  
tion Which He  
Leads

Manchester, N. H., Nov. 13.—A lively topic for discussion was furnished members of the national grange as they assembled for yesterday's sessions of the annual convention, in the declaration of National Master Oliver Wilson that an effort was being made to disrupt the organization.

"The interests behind this movement," said Mr. Wilson in addressing a public meeting Wednesday night, "have come here to further their work. They have sent reports back to the middle West and to Washington that the national grange is controlled by bosses and bankers. The fact that they are attempting to disrupt the national grange we cannot get away from."

A business session yesterday forenoon was followed by the conferring of the sixth and seventh degrees upon large classes.

The grange took a recess yesterday until this morning, the day being devoted to conferring the seventh degree upon several thousand members in the Manchester auditorium, and the sixth degree in Mechanics' hall. The seventh degree was conferred by the national grange and the sixth degree by the New Hampshire state grange. Three special trains conveyed grangers from Massachusetts. The number of patrons receiving degrees is the largest in the history of the order.

### MALONE CONFIRMED BY SENATE.

He Will Succeed Mayor-Elect Mitchell at Port of New York.

Washington, D. C., Nov. 14.—The nomination of Dudley Field Malone, third assistant secretary of state, to be collector of the port of New York, was yesterday confirmed by the Senate. No opposition was made to his nomination. By the Senate's action yesterday, Malone gets one of the biggest plums within the gift of President Wilson. The collectorship carries with it an immense amount of patronage. Malone was named to succeed Mayor-elect John Purroy Mitchell of New York as collector immediately after Mitchell's election, and the route of Tammany, in which Malone was largely instrumental.

Other confirmations yesterday were: To be assistant commissioner of patents—James T. Newton. To be solicitor of internal revenue—Ellis C. Johnson. To be general appraiser of merchandise at New York—George S. Brown.

### MRS. FANKHURST WON'T MARRY.

Militant Leader Calls Proposal "Impudent and Insulting."

Hartford, Conn., Nov. 14.—When asked yesterday if he would accept the proposal of Dr. Henry S. Tanner of Los Angeles, Mrs. Emmeline Fankhurst said:

"It's impudent and most insulting. I'm a politician and am not considering such things."

The militant leader had dinner at the home of Mrs. Thomas N. Hepburn, president of the Connecticut Woman Suffrage association, Wednesday evening. During the dinner, she denounced the Connecticut laws under which Mrs. Bessie Wakefield had been sentenced to the gallows.

"It would be a crying shame," she said, "to hang a woman whose consent is not asked about the law which may deprive her of life."

### BOY'S BULLET KILLS GIRL.

Mary Joyce Shot to Death Because She Did Not Move to Suit Boys.

Boston, Nov. 14.—Mary Joyce, 12, was shot to death yesterday at a place she did not move fast enough at the command of two boys. The police are searching for Christopher Harris, 14, and Thomas Foley, 16, both of whom are armed with revolvers.

The two boys quarreled in the street and went into a field to fight it out, followed by a crowd. Harris and Foley, it is said, perched on a fence and, brandishing revolvers, said: "Get out of here or we shoot."

The children bolted for the street, a shot rang out, and Mary Joyce, in the rear of the throng, fell dead with a bullet in her head.

### NEW PASTOR AT LYNDONVILLE.

Rev. Clarence A. Simmons Accepts Universalist Call.

Lyndonville, Nov. 14.—The Universalist society at this place has extended a call to Rev. Clarence A. Simmons of Macedon, N. Y., to become its pastor. Mr. Simmons will accept and will begin his work January 1, 1914. He will succeed Rev. Thomas Stratton who resigned November 1 to become pastor at Richmond.

Mr. Simmons, who has been in the ministry since 1908, is a Vermont boy, having been born in Woodstock where his father, the Rev. J. S. Simmons, was pastor of the Universalist society for many years, and until his death.

### Verdict of Guilty.

Worcester, Mass., Nov. 14.—A sealed verdict of guilty was returned yesterday in the superior criminal court against Joseph M. Caldwell, who was one of the strike leaders during the labor troubles at the Draper company plant last spring, on an indictment charging him with assault on Jules Harant, an employee of the Draper company on May 7. The complete outburst while Caldwell was not personally assaulting Harant, he incited strikers to attack the man when he was on his way to work.

## "Whee! Corns Gone! 'GETS-IT' Did It!"

Ever Try It Before?—You'll Marvel How  
It Makes Corns Vanish.

There never was anything like "GETS-IT" for corns, and there isn't anything like it now. It is the corn cure on a new principle. Put it on any corn in

"Use 'GETS-IT' for Corns and Their Pains—  
And Nothing But Pleasure  
Remains!"

two seconds; it stops pain, the corn begins to shrivel and disappears. It never falls. Simplest thing you ever saw. No fussy bandages, no greasy ointments to turn healthy flesh "peely" and raw, no plasters that make corns bulge out. Your corns won't "pull" and hurt 'way up to your heart. Lay aside your knife and razor. No more digging and tugging and wincing, no more bleeding, no more danger of blood poisoning. "GETS-IT" never hurts healthy flesh; it is safe, painless, quick, simple, sure. For warts, callous and bunions, too.

"GETS-IT" is sold at all druggists at 25 cents a bottle, or sent on receipt of price by E. Lawrence & Co., Chicago.

### VERMONT FARMERS' SCHOOL

Will Be Conducted in Various Places by State University.

The extension service of the University of Vermont plans to hold extension schools in various sections of Vermont during the coming winter. Arrangements for extension schools are already under way in different sections of the state. An extension school is simply a school of instruction for farmers, more formal, more educative, more helpful, lasting longer than the farmers' institute. Farmers are regularly enrolled as students. The various subjects are handled as systematically as in a school. Lessons and demonstrations are given and whenever possible actual practice work is done. The farmer-student will not only be told how and shown how to prune a tree, or judge a cow, or test a soil for acidity, he will himself, under direction, do these things. It is much like farmers' week at the state university brought to the farmers' doors.

At least three state university men will man each school. The institute forces of the state commissioner of agriculture will at times assist. School sessions will open Monday afternoons and close Friday afternoons. Five sessions daily, each an hour long, three being lessons and two object lessons or demonstrations, will ordinarily be held, at hours arranged as far as possible to meet the views of the majority of the registrants.

Three of the following subjects, each eight lessons and demonstrations, can be discussed at each school.

1. Dairying.
2. Breeding and Management of Live Stock.
3. Feeds and Feeding.
4. Farm Crops (including hay, corn, clover, alfalfa, cereals).
5. Soils and Soil Management.
6. Fruit.
7. Poultry Husbandry.
8. Forestry.
9. Farm Management and Machinery.

Soils and Soil Management, being a fundamental in any school of agriculture, will always be discussed. The farmers registering in advance choose three or four of the above subjects other than soils, stating them in the order of their preferences. So far as possible, majority votes will control choices.

No charge is made for extension school instruction. A warmed and lighted hall must be furnished free. Only those persons who register can be assured accommodations, and registrants must agree in advance to attend at least three-fourths of the exercises. An advance registration of twenty-five adult persons will be necessary, in order to secure a hall for a given locality. Parties interested should correspond with Thomas Bradley, director state extension service, University of Vermont, Burlington, Vt.

### Senate's Wedding Gift to Be Silver.

Washington, D. C., Nov. 14.—The Senate's present to Miss Jessie Wilson at the time of her marriage to Francis B. Sayre will consist of a beautiful set of silver, costing about \$1,000.

Senator Martin of New Jersey is handling the fund. The silver will consist of a tea urn, a coffee percolator, candelabra, compotes, and silver flower vases and trays.

The New Jersey senator said all would be suitably inscribed, "so they can be handed down as heirlooms."

### SERIOUS CATARRH

YIELDS TO HYOMEI

Do not let this serious disease extend along the delicate mucous membrane, gradually going from the nose to the throat, thence into the bronchial tubes and downward until the lungs are reached.

There is no other treatment for catarrh that is like Hyomei, so quick, so good. None can take its place, none give such quick, effective and sure relief and at so little cost—furthermore, the Red Cross Pharmacy will refund your money if you are not benefited. Hyomei, as sold by all druggists, reaches the most remote cells of the air passages, kills the catarrhal germs, soothes and heals the irritated mucous membrane.

Begin its use now—to-day, and see how quickly the droppings into the throat, the discharges from the nose, sniffling and all other symptoms of catarrh are overcome; and remember—no stomach drugging—just breathe it. The complete outfit containing inhaler and bottle of liquid costs but \$1.00. Extra bottles of liquid, if later needed, 50 cents.—Adv.

## SIX SHIPS, 100 MEN LOST

Record for the Great Storm  
on Lake Hu-  
ron

ON ALL OTHER LAKES,  
14 SHIPS, 150 MEN

Most Disastrous November  
Ever Known on  
Lakes

Port Huron, Mich., Nov. 14.—Reports of more missing vessels came in yesterday, but great fog banks had settled down over Lake Huron, and the secret of the number and identity of lost ships and the men drowned in the gale on this lake was far from being determined.

The latest report was to the effect that the steamer John A. McGeen of the Hutchinson Pioneer Steamship company of Cleveland, had gone down.

Including the McGeen, six ships may be on the bottom of Lake Huron and a hundred or more sailors are almost certain to have been drowned.

The bodies of two men who sailed on the McGeen are said to have been picked up yesterday in the St. Clair river below Sarnia.

The steamer passed here bound up at 2 p. m. Sunday morning and nothing had been heard from her since then until the report came in that she had sunk.

Up to yesterday forenoon, twenty-nine bodies had been tossed up on the Canadian shore from Point Edward, opposite here, north to Goderich. Life belts, life boats and water-soaked cargo indicated that the steamers Regina, Charles S. Price, Wexford and James Carruthers were at the bottom of the lake. In the meantime the overturned derelict lying in the lake a few miles northeast of here was as mysterious as ever.

A diver was ready yesterday morning to make another effort to learn her name, but he had to wait for the lifting of the fog.

Although a marine men in this locality were still firm in their belief that the overturned steamer is the Regina, the latter's owners were insistent to the contrary.

Identification of but four of the bodies washed ashore had been made up to this time.

Reports were current to the effect that ghouls had been busy and that the frozen bodies had been robbed of all their clothes contained which might lead to identification. Provincial detectives yesterday were investigating these reports.

It is believed that at least ten vessels have been lost with nearly 160 lives.

Cleveland, O., reports that the bodies of three men, lashed to a life raft, have been identified as members of the McGeen's crew.

Eighteen more bodies have been washed ashore at Goderich.

At least five other vessels on Lake Huron have not reported for several days. They are the Northern King of the Mutual Transportation company of Buffalo; the Manola of the Pittsburgh Steamship company of Cleveland; the I. M. Scott, Argus and the Hydrex of Cleveland. The Argus was reported lost, but her fate has not yet been definitely learned. The Northern King was reported safe yesterday.

The steamer David S. Norton, which left Whitefish Saturday afternoon, has not yet arrived in port, and fear is expressed that she has been lost. The Norton is a steel freighter, 400 feet long, and carried 500 tons of coal. Later reports say she is safe.

### TO CELEBRATE FARM LIFE.

Schools Are Holding Celebrations in Some States.

So fundamental is the upbuilding of rural life, in the opinion of Dr. P. P. Claxton, United States commissioner of education, that the observance in the schools of one day each year as "Agriculture and Rural Life Day" should become a national custom, instead of being confined to a few states, as at present. "We can do without some of our anniversaries, if need be," says Dr. Claxton, "to have time for this, the most fundamental of all. The children in our schools should be given an opportunity to pause in their regular work and consider the significance of agriculture and rural life; the worth and worthiness of tillage of the soil; and the beauty and glory of simple and sane life in the open country."

Dr. Claxton points out that in several states "Agriculture and Rural Life Day" has already been introduced into the schools, at the suggestion of the bureau of education. In other states exercises appropriate to the purpose are held in connection with Arbor day, Thanksgiving day, or the harvest home celebration. In order to aid in the proper observance of the day, under whatever name it may be celebrated, the bureau of education has just issued a bulletin containing material that can be used by teachers and others in arranging an interesting program.

Fittingly prefaced with the "County Boy's Creed," the bulletin includes sections on man's struggle for food; the application of science to agriculture; man's influence in improving agriculture; from George Washington down through Luther Burbank, Liberty H. Bailey, and other present-day men; our domestic animals; and a study of forests.

How vegetables have been used as medicines among different peoples; breadmaking through the ages; the mysteries of mother earth; the origin of food plants; co-operation among farmers; wonders of a single acre—these and other topics treated with special reference to glorifying country life. Following each discussion there is a list of suitable poems and songs on farming and farm life.

"What we have tried to do," said Dr. Claxton yesterday, "is to get together in convenient form material that will help in the movement for appreciation of the true value and beauty of farm life among all classes of our population. The wider observance of agriculture and rural life day both in city and country schools, will give the coming generation a clearer insight than the past has had into the fact that agriculture is the basis of national well-being, and that there is no more honorable work in life than that on the farm."

**TOO MANY CHILDREN**  
are pale and frail—backward in studies—with pinched faces and poor blood—their minds and bodies are actually starved because their regular food does not nourish.

Such children need *Scott's Emulsion* above everything else; it contains nature's rarest life-giving fats; it is essentially food value—blood-food and bone-food, free from wine, alcohol or harmful drug.

*Scott's Emulsion* often builds many times its weight in solid flesh—its medicinal, tonic and nutritive properties make all good food do good.

IT IS NOT A PROP, BUT A FOUNDATION FOR STURDY GROWTH. Every Druggist Has It. Avoid Substitutes.

### SALE OF PHILIPPINE TIMBER.

Offers Good Chance for American Lumbermen, It Is Said.

The first big sale of Philippine timber, offering opportunities for lumbermen in the United States, has just been announced by the bureau of insular affairs of the war department.

While there are American firms operating in the Philippines, it is pointed out by the officials of the bureau that the Philippine islands offer to progressive lumbermen chances for profits not excelled by any other field in the world. The forest officers of the Philippines state that the islands contain 200,000,000,000 feet of merchantable timber for which there is a large present demand and that practically all of it is owned by the government and is available under very favorable terms. In almost all cases the forests can be easily logged by the most improved machinery and methods.

The timber itself, it is pointed out, includes structural material of great value in addition to many fine hardwoods particularly suited to cabinet work. In this latter class some of the most plentiful woods may be sold in competition with mahogany, such is their beauty of grain and richness of color. Manila is only two days' distance from Hongkong, and China, which is largely exhausted its timber, furnishes a ready market. Japan, Australia, and even the United States, will take Philippine lumber, which is admitted free to this country. One of the commonest Philippine timbers, red lauan, which works and finishes well, has been sold on the Pacific coast, where it serves the same purposes as the finest redwood, which it somewhat resembles, as high as \$80 per thousand board feet.

Government timber in the Philippines is offered at a very low rate and it is stated that the labor problem is in no sense difficult. Investments by Americans are not only invited, but are encouraged.

The Philippine bureau of forestry, in this first sale which is being called to the attention of American timber operators, is offering a 20-year concession which gives exclusive rights to a tract comprising about 95,000 acres, which contains nearly 2,000,000,000 board feet of timber. It is required that the successful bidder shall keep up a certain minimum output, which starts with 15,000 board feet during the first two years and increases to an ultimate output of at least 21,000,000 per year. A modern sawmill and logging equipment must be established and also a patrol system for the prevention of fires and trespass.

A complete report on this body of timber, which can be had at the office of the director of forests in Manila or at the bureau of insular affairs in Washington, shows that the region occupied by the main body of the tract presents ideal logging conditions. This report shows that railroads can be built easily and cheaply and that the entire timber belt can be logged at a minimum of expense and trouble. The amount of timber per acre varies from 12,500 up to 30,000 board feet and more. In the four principal types of forest embraced in the area, much valuable material can be secured from even the least desirable type, and the most valuable types will, according to figures of the bureau, provide a handsome profit for an outlay comparatively small in relation to the value of the timber which is to be exploited.

The principal kinds of wood are the lauan, excellent construction timbers and somewhat comparable in mechanical properties, to the Pacific coast redwoods; yam, one of the most valuable because of its great strength, and its resistance to destruction by white ants; apitong, quite comparable to the hard pines of the United States, and various other hardwoods which have already found a place as substitutes for mahogany.

It is required that the successful applicant shall furnish a capital sufficient for the immediate prosecution of the work, the amount in this case being placed at not less than 100,000 pesos, Philippine currency, equivalent to \$50,000.

It is proposed that all bids for this timber shall be opened in Manila on Dec. 10. For the benefit of prospective purchasers in America, however, unable to prepare their applications and have them received in Manila on or before that date, the bureau of insular affairs in Washington will, on notification, before the final day send a cablegram and have the time extended until the actual bids can be received in Manila.

### CHAUFFEURS' STRIKE ENDS.

Settlement Is Reached After 10 Days' Struggle.

Philadelphia, Nov. 14.—The strike of the taxicab drivers in force here for the last 10 days practically ended last night when members of the Chauffeurs' union accepted the compromise agreed upon by the management of three of the four companies involved.

Union drivers will receive \$2.25 per day and free gasoline and repairs.

### Dr. McBurney.

The death, in Brookline, of Dr. Charles McBurney marks the passing of one of a group of American surgeons who have placed this country in the forefront of surgical science. His career is of peculiar interest to Bostonians because of his close connection with the disease appendicitis, which was discovered by Dr. Reginald Heber Fitz, who died several weeks ago.

Dr. Fitz pointed out the seat of the disease. Dr. McBurney perfected the cure. The operation now in vogue for the treatment of appendicitis is the McBurney operation. The incision is called "The McBurney," and the exact spot where tenderness is felt and through which a diagnosis is facilitated, is called "McBurney's point."

Dr. McBurney's reputation as a surgeon was immense, and gave him the unique distinction of being called to the bedside of two presidents fatally injured by the assassin's bullet—Garfield in 1881 and McKinley twenty years later.

Dr. McBurney is peculiarly associated with Boston. He was born in Roxbury and attended Harvard college, and though he established himself in New York always kept up the closest connections with the city of his birth.—Boston Herald.

# Quaker RANGES

There's half a century's experience and practical improvements in the new Quaker Ranges that we are selling so fast this season

The more you know about a Quaker Range—the more you'll want to own one.
